B: both in-plane pole components govern alignment; the normal component does not
alignment gained toward the real plane [deg]
R^2 = 0.644
optimum +63 mm
B2: swept along normal n
B3: swept along tangent t_1
B4: swept along tangent t_2
pole offset along t_1 [mm]
R^2 = 0.195
optimum +56 mm
pole offset along t_2 [mm]
R^2 = 0.010
-0.006 deg/mm
pole offset along normal [mm]
